Areas of maximum expertise

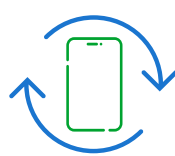

BUSINESS SOFTWARE

Your customized solution

E-GOVERNMENT SOFTWARE

Government services

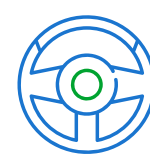

MOBILE & WEB APPLICATIONS

iOS & Android devices and web platforms

PAYMENT SYSTEMS

ATMs, QR payments, CoDi and other gateways

MOBILITY SOFTWARE

LPR and RFID reading, vehicle tracking and routing

DIGITAL SIGNAGE

Managing and viewing media content

Every part of your system is taken care of

01

User Interface (Frontend)

We generate fluid, easy-to-use and optimized interfaces for mobile and desktop devices. We are also experts in user experience (UX).

02

Server-side technology

We develop applications with the most advanced programming languages, following suitable software engineering methodologies for applications of any size and complexity.

03

Mobile Technology

Our methodologies allow us to develop native mobile applications and web applications that function as an extension of your online system, sharing the same centralized information. We make applications for Apple and Android devices.

04

Database

We work with the most advanced database technology to ensure your data is safe and available when you need it, regardless of the number of processes you carry out or the volume of your data.

05

Servers

Take your applications and services to the cloud, with the help of our team of specialists, and optimize operating and infrastructure costs with the solutions and tools that Xilion offers.
